ROME, June 24.—In Naples, Turin, and Milan demonstrations have occurred in protest against the formation of the cabinet by Francesco Nitti, former minister of finance. It is reported that these demonstrations have been promoted by organizations composed mostly of former soldiers, who believed that Signor Nitti's policy is favorable to a renunciation of part of the claims of Italy to the eastern coast of the Adriatic, which were maintained at Paris by former Premier Orlando and former Minister of Foreign Affairs Sonnino.

## STUDY OF WATER SUPPLY IS URGED

Investigation of all available sources of water supply in the District of Columbia, a matter that will receive the attention of the District Committee in the near future, is called for in a bill introduced by Senator Sterling of North Dakota.

Senator Sterling's measure directs the Secretary of War to appoint a commission to make a complete report on the question. The report is to be accompanied by data and estimates as to the probable cost of the project to furnish water sufficient to augment the present local supply. An appropriation of \$15,000 is available in the bill.

The commission is to be composed of five members, three of whom shall be selected from the corps of engineers, United States army, one from the Washington suburban sanitary commission, and one from the District Engineering Department.

Senator Sterling's bill follows closely the line of investigation contemplated by the District Committee, inasmuch as it does not include the question of waterpower development which has held up Congressional action for many years.

## CIVIL SERVICE LIFTS BAN AGAINST ALIENS

That aliens in this country, who declare either formally or informally their intentions of taking out citizenship papers, will be eligible under the civil service for certain Government positions, was the announcement of L. H. Fisher, secretary of the fourth civil service district, yesterday.

The declaration was made in connection with the need of employing a number of alien optical workers at the Navy Yard. It was said that a group of these workers are to be brought to the local Navy Yard, as such workers are scarce at present. They are coming from an optical company in New York State which has been operating under Government control.

A definite declaration of intention is all that will be necessary to allow such workers to enter the civil service. This differs from the old regulation which provided that all applicants for civil service positions must be naturalized.

Although many of the New York workers are not naturalized, it was declared these men have been in the employ of the United States for more than a year, and have been found trustworthy.

## WEDS ONE DAY; KILLS SELF NEXT

NEW YORK, June 24.—A prosaic advertisement in the newspapers announced that Arthur L. Niles, Jr., the young naval officer and Princeton graduate who killed himself last Wednesday night, was secretly married just one day before his death. Dorothy Hathaway Sutton, the nineteen-year-old daughter of Eli R. Sutton, the financier, was his bride.

The young man's family knew nothing of the marriage until after his death. The young widow said at her father's country home in Garden City today that she could not imagine why her husband had committed suicide. She declares they were "completely happy."

The clergyman who performed the ceremony refused to reveal a detail, because he was pledged to secrecy.
